Epicor has engaged with the Ispirer team to create and refine prototype techniques for migrating certain parts of the Epicor Progress ABL code to well performing C# code using the SQLWays migration tool.

We have found the Ispirer team to be knowledgeable and responsive and we have found the tooling to be flexible enough to be easily adapted to our coding conventions.

I would be happy to recommend the team and SQLWays tooling for any project involving migration of code between platforms.

A handwritten signature in blue ink that reads "Erik Johnson". The signature is written in a cursive, flowing style.
